

Polk Health Care Plan Formulary Drug List

AUGUST 2017

The **Polk Health Care Plan Formulary Drug List** is a guide within select therapeutic categories for clients, plan members and health care providers. **Generics should be considered the first line of prescribing.** If there is no generic available, there may be more than one brand-name medicine to treat a condition. These preferred brand-name medicines are listed to help identify products that are clinically appropriate and cost-effective. Generics listed in therapeutic categories are for representational purposes only. This list represents brand products in CAPS, and generic products in lowercase *italics*.

PLAN MEMBER

Your benefit plan provides you with a prescription benefit program administered by WellDyneRx. Ask your doctor to consider prescribing, when medically appropriate, a preferred medicine from this list. Take this list along when you or a covered family member sees a doctor.

Please note:

- To avoid the full cost payment associated with non-formulary drugs, please ask your prescriber to refer to this preferred drug list when prescribing medications for you and your dependents. Substitution of generic products is mandatory when available.
- For more information regarding your prescription benefit coverage and copay, please visit PolkHCP.welldynrx.com or contact a WellDyneRx Member Service representative.
- Any brand drug for which a generic product becomes available may be designated as a non-preferred product.

HEALTH CARE PROVIDER

Your patient is covered under a prescription benefit plan administered by WellDyneRx. As a way to help manage health care costs, authorize generic substitution whenever possible. If you believe a brand-name product is necessary, consider prescribing a brand name on this list.

Please note:

- The member's prescription benefit plan may have a different copay for specific products on the list.
- You can visit PolkHCP.welldynrx.com to get the most up to date information on the Formulary and copays.

ANTIDIABETIC AGENTS

INSULINS

FOR YOUR INFORMATION: Generics should be considered the first line of prescribing. Any brand drug for which a generic product becomes available may be designated as a non-preferred product. The member's prescription benefit plan may have a different copay for specific products on the list. Listed products may be available generically in certain strengths or dosage forms. Dosage forms on this list will be consistent with the category and use where listed. Contact a WellDyneRx Member Service Representative at (877) 602-POLK (7655) for more information.

¹Copayment, copay or coinsurance means the amount a member is required to pay for a prescription in accordance with a Plan, which may be a deductible, a percentage of the prescription price, a fixed amount or other charge, with the balance, if any, paid by a Plan.

PA Prior Authorization

QL Quantity Limits apply

ST Step Therapy required

Your privacy is important to us. Our employees are trained regarding the appropriate way to handle your private health information.

This document contains references to brand-name prescription drugs that are trademarks or registered trademarks of pharmaceutical manufacturers. Listed products are for informational purposes only and are not intended to replace the clinical judgment of the prescriber.
